PROFESSIONAL PROFILE

Microsoft Power Platform and Copilot Consultant with four years of commercial experience delivering business applications, automation and integrations. Combines hands-on development across Power Platform, SharePoint and Microsoft 365 with requirements analysis, functional consulting, testing and user adoption. Experience includes Copilot agents, business-process automation and corporate training, working with business users and technical teams to turn operational needs into practical, maintainable solutions.

CORE EXPERTISE

Power Platform: Power Apps (canvas and model-driven; Power Fx), Power Automate (cloud, desktop and child flows), Dataverse, Power BI and Power Pages.

SharePoint & Microsoft 365: SharePoint solutions and custom components using SPFx, React, TypeScript and PnPjs; integration with Power Automate and Microsoft 365.

Copilot & AI: Microsoft 365 Copilot, Copilot Studio, AI Builder, Azure OpenAI Service models, Azure AI Search and prompt engineering.

Integration & Development: REST/SOAP APIs, SQL, relational databases and .NET back-end services; data integration across SharePoint, Dataverse and Excel.

Consulting, Governance & Delivery: Requirements and process analysis, stakeholder engagement, testing/UAT support, documentation, coaching, environment preparation, maintenance and governance. Power Platform solutions and connection references; deployment pipelines and version control in selected projects and an internal ALM proof of concept.

PROFESSIONAL EXPERIENCE

Microsoft Power Platform Consultant and Coach

Niteo Technologies | Nov 2024 - Apr 2026 | São Paulo, Brazil

- Combined hands-on implementation, functional consulting and coaching across Power Apps, Power Automate, Dataverse and Copilot Studio; supported requirements discovery, solution design, testing, user acceptance validation and adoption.
- Delivered two Copilot agents with an agribusiness client team: one queried deliveries in progress; the other captured improvement ideas and checked similar existing suggestions, replacing email submissions. The solution was adopted across the organisation.
- Helped implement a Copilot solution over a data lake for a public-transport business, providing financial and other business information; contributed to governance so each department accessed only its authorised data.
- Guided business users and technical teams in building canvas and model-driven apps, flows, Dataverse solutions, dashboards and portals; supported troubleshooting and good practices in security, environment management and integrations.
- Delivered corporate training to two cohorts of 20 participants using an implemented solution to demonstrate business use cases, plus separate advanced prompting training. Prepared tailored workshops, labs and technical materials; coached users and technical teams. Across engagements, client feedback included NPS scores above 90.

PROFESSIONAL EXPERIENCE

Junior Power Platform Analyst

Siplan | Apr 2024 - Jun 2024 | São Paulo, Brazil

- Developed business pages, applications and components with Power Pages, SPFx, React, TypeScript and PnPjs within Microsoft 365.
- Built Power Automate workflows and integrated SharePoint and Microsoft 365 solutions to digitalise business processes.
- Contributed to requirements analysis, testing, debugging and iterative improvement of tailored applications.

Junior Systems Analyst

MLEGATE Solutions | Feb 2022 - Apr 2024 | São Paulo, Brazil

- Gathered requirements in HR, Accounting and Operations and developed Power Apps for leave, contracts, teams, deadlines and operational information.
- Built Power Automate workflows for tasks, notifications, approvals, tax-related queries and data transfers; supported testing, documentation and users.
- Integrated external systems through REST/SOAP APIs, SQL, relational databases and .NET back-end services.
- Created Power BI dashboards and reports to monitor indicators and support business decisions and continuous improvement.

ADDITIONAL PROJECT EXPERIENCE

- Across business projects, developed more than 100 Power Automate workflows and more than 50 Power Apps; used child flows to isolate responsibilities and simplify troubleshooting.
- Automated company tax and registration checks using external services, cloud flows, Power Automate Desktop and SOAP integrations, with notifications to responsible teams and clients.
